ThreeLac®

ThreeLac® is a powerful probiotic formulation of three potent microflora with a unique probiotic blend with a long history of use for maintaining healthy levels of candida albicans and supporting a balanced intestinal microbiome. The probiotic blend in ThreeLac reintroduce beneficial bacteria crowd out harmful yeast and pathogens. By resulting in the production of lactic acid it lowers that intestinal Ph to discourage yeast growth, and enhances the breakdown and absorption of nutrients.

Key Highlights

How TheeLac® Supports You

Unlike many probiotics that die in stomach acid, **ThreeLac®** uses a **micro-encapsulation process** that protects the live bacteria as they pass through the acidic environment of the stomach. Once in the alkaline environment of the intestines, the coating dissolves and releases the active bacteria where they can colonize.

This protective delivery system is a key part of why **ThreeLac®** tends to have higher survival rates and efficacy compared to standard probiotics.

TheeLac® was formulated with both gut health and vaginal health in mind, working to help maintain a healthy balance of Candida albicans and other types of yeast throughout the intestinal tract.

Intended Benefits

- Balancing intestinal flora after antibiotics or poor diet
- Supporting digestion and nutrient absorption
- Reducing yeast overgrowth & candida-related issues
- Supporting immune system strength
- Improving regularity & reducing bloating or gas

Applications/Delivery Format

- Bulk Stick Packs
- Capsules

Probiotic Strains

- Bacillus coagulans
- Bacillus subtilis
- Enterococcus faecalis

Shelf Life

- 2-Year Shelf Life.

FiveLac®

FiveLac® was the second addition to our Probiotic line, harnessing all the power of ThreeLac with the addition of two more scientifically studied strains of good bacteria for increased benefits. The 5 strains of friendly flora in this powerful probiotic work synergistically to repopulate beneficial flora in the intestines; compete with harmful microorganisms (such as *Candida albicans*) for space and nutrients; enhance digestion of proteins, fats, and carbohydrates; support immune function, since much of the immune system resides in the gut.

Key Highlights

How FiveLac+® Supports You

Unlike many probiotics that die in stomach acid, **FiveLac®** uses a **micro-encapsulation process** that protects the live bacteria as they pass through the acidic environment of the stomach. Once in the alkaline environment of the intestines, the coating dissolves and releases the active bacteria where they can colonize.

This protective delivery system is a key part of why **FiveLac®** tends to have higher survival rates and efficacy compared to standard probiotics.

FiveLac® was formulated with both gut health and vaginal health in mind, working to help maintain a healthy balance of *Candida albicans* and other types of yeast throughout the intestinal tract.

Intended Benefits

- Addresses occasional digestive upset, bloating, or irregularity
- Addresses yeast imbalance (especially *Candida* overgrowth)
- Immune support
- General gut flora maintenance after antibiotics or poor diet

Applications/Delivery Format

- Bulk Stick Packs

Probiotic Strains

- *Bacillus coagulans*
- *Bacillus subtilis*
- *Enterococcus faecalis*
- *Lactobacillus acidophilus*
- *Bifidobacterium longum*

Shelf Life

- 2-Year Shelf Life.

Stomach Pro+®

The Science of LJ88®

Inside every stick pack of STOMACH PRO+® is LJ88® (*Lactobacillus johnsonii* #1088) — a unique postbiotic strain originally discovered in the human stomach. It's built to survive your body's toughest environment — acidic gastric conditions — to help restore comfort, balance, and protection where digestion begins.

Key Highlights

How STOMACH PRO+® Supports You

- Balances Stomach Acid Naturally — Helps calm excess gastric acid for relief from heartburn and reflux.
- Fights Harmful Bacteria — Inhibits *Helicobacter pylori*, supporting a healthier stomach environment.
- Strengthens Digestive Balance — Encourages beneficial intestinal gut bacteria (Bifidobacteria) for improved digestion.
- Clinically Researched Results — Backed by 15+ years of research and human clinical studies.
- LJ88 pairing — To further enhance the health impact of Stomach Pro+, LJ88 is blended with Morinaga's highly proven BB536 probiotic.

Safe. Stable. Proven

- Heat-Killed for Stability — No refrigeration required, retains biological activity.
- Safe for Everyone — Including sensitive or immunocompromised users.
- Globally Trusted — Used in Asia, Europe, and the U.S. since 2016 with no adverse effects reported.

Shelf Life

- 3-Year Shelf Life.

Applications/Delivery Format

Bulk Stick Pack available for private label opportunities.

Patents

- LJ88 is Patented in Japan, Korea, and USA
- Morinaga BB536 is Patented in Japan, China, and USA
