

Ingredient

Algalithe®

Algalithe® comes from Lithothamnion Calcareum, a red algae of the corallinaceae family sustainably harvested from the pristine Norwegian waters, and it is the premiere new market solution for a qualified plant-based Calcium material. Offered in Powder Form with two Particle Sizes – 25 microns for blends and 150 microns capsules. Its mineral composition consists of greater than 32% elemental calcium, greater than 2% elemental magnesium and over fifty trace minerals.

The calcium carbonate composing **Algalithe®** is present in two complementary crystalline forms, calcite and aragonite, which allow a progressive release of calcium in the intestine, enhancing absorption.

Key Highlights

NPN #80128504 Health Claims

- Helps in the development and maintenance of bones and teeth.
- Adequate calcium as part of a healthy diet.
- May reduce the risk of developing osteoporosis.
- Source of/provides electrolytes.
- Helps to maintain/support muscle function.
- Helps maintain/support bone health.

Additional Points

- Exceptional Vegan Calcium Solution.
- Ethically and Sustainably Harvested.

Product Composition

- Greater than 32% Elemental Calcium.
- Greater than 2% Elemental Magnesium.
- Additional Trace Minerals.

Suggested Clinical Dosage

500mg 1-5 times per day

Quality Control

- Halal
- Vegan
- Kosher
- FSSC 22000
- Non-GMO (NGPV in process)

Shelf Life

36 months from Manufacture Date.

Applications/Delivery Format

- Powder Blends
- Sachet
- Capsule
- Stick Pack
- Tablet

Country of Origin

- Manufactured in France.
- Harvested in the North Atlantic.
